

International Day of Astronomy Program

7 May 2009

The Planetarium Science Center (PSC) will celebrate the international Day of Astronomy on Thursday, 7 May 2009, where PSC specialists will conduct a number of astronomical interactive activities with school students who have joined our numerous programs during the current academic year.

Astronomy Day is a movement designed to share the joy of astronomy with the general public under the theme "Bringing Astronomy to the People." On that day, thousands of people who had never had the chance to look through a telescope will have the opportunity to see and share the excitement with amateurs and professional astronomers sky observation.
