Biotechnology:

A Reader's Guide to Selected Sources

Compiled by Mariana Assad

Revised February 2007

The Bibliotheca Alexandrina reference librarians have prepared this guide of selected materials on *Biotechnology*, to assist users in finding primary resources within the library. This guide is not intended to be comprehensive but rather to provide a convenient starting point for research.

B *iototechnology* is the application to industry of advances made in the techniques and instruments of research in the biological sciences, to improve plants or animals, or to develop microorganisms for specific uses. The growth of the field of biotechnology is closely linked to the development in the 1970s of genetic engineering.

(*Encyclopedia Britannica*, 2006)

Subject Headings related to *Biotechnology*

Materials on *Biotechnology* may be found by searching the Bibliotheca Alexandrina Online Public Access Catalog (OPAC) using the following subject headings:

- Biochemistry
- Biomedical Engineering
- Biochemical Genetics
- Biotechnology
- Genetic Engineering

- Plant Biotechnology
- Biochimie
- Biotechnologie
- Génie génétique
