World Health Day, 2005 Make Every Mother and Child Count
<http://www.who.int/world-health-day/2005/en/>

This year's theme for World Health Day is health and well being of mothers and children. It is designed to make women's and children's health a priority for the world. We in the Supercourse honor World Health Day.

"Fate chooses your relations, you choose your friends." - Jacques Delille

Tell a Friend about the Supercourse on World Health Day:

www.pitt.edu/~super1

We too want to foster the improvement of Global Health by spreading Prevention world wide. We would like each of you to send a friend this email about the Supercourse and Prevention and encourage them to join on April 7,2005. Ask your friends to send this invitation to their friends as well.

The Supercourse is a global effort of 20,300 faculty from 151 countries. We have been collecting the best PowerPoint lectures on Prevention. We have 2177 lectures from leading scientists world wide. The lectures are available for free at the web site.

Our effort is truly global, and designed to improve training in prevention.

You can join the Supercourse at <http://www.pitt.edu/~super1/assist/join.htm> . An overview of the Supercourse is provided at: www.pitt.edu/~super1.

On World Health Day, please distribute this to a friend today, and ask he/she to distribute it to a friend to share prevention by "snowballing" the message world wide.

"A real friend is one who walks in when the rest of the world walks out.", Walter Winchell

"Do not use a hatchet to remove a fly from your friend's forehead." - Chinese Proverb

The Supercourse faculty are your friends, friends of your children and friends of your colleagues. Please tell others about this global effort today.

Best regards, and Happy WHO Day!!

Sincerely,
Ron, Faina, Mita, Soni, Eugene, Samar, Julia, Tom, Deb, Rania
